

GRADUATE CAREERS WITH ECONOMIC INSIGHT

RECRUITMENT INFORMATION PACK 2023

WORKING AT ECONOMIC INSIGHT

At Economic Insight, you will join a team of professional and highly motivated economists, helping our clients achieve their objectives and make strategic decisions.

Most importantly, our business grows by its people. We encourage rapid career progression and will make sure you get the support needed throughout.

Early on, you will participate in client meetings and, within a year of starting, you will be contributing to growing the business through identifying new commercial opportunities, along with helping to realise them by writing proposals and developing marketing initiatives.

You will also have an active role in contributing to the wellbeing of the team and organising social events.

WHAT WE LOOK FOR IN A CANDIDATE

We look for first rate candidates from top universities, who have a strong understanding of economics and, most importantly, the ability to use this understanding to solve real-world problems.

You will be smart, commercially aware, tenacious and enjoy tackling difficult challenges.

Our team strives, and is passionate about, communicating economic analyses to clients in a clear and constructive way - and potential candidates will share this quality.

All our team members also care about each other's growth and wellbeing, and potential candidates can look forward to working collectively with others and joining a supportive environment.

WHAT WE DO

OUR PRACTICE AREAS

We provide economics support to a wide range of organisations across four main practice areas:

COMPETITION

DISPUTE RESOLUTION
& LITIGATION

REGULATION

STRATEGY

Our approach is to combine rigorous technical economics with exceptional consulting skills, and we believe this is our edge.

COMPETITION

The market for competition economics advice has been growing rapidly over the last decade and it shows no signs of stopping.

Our experience is that economics advice and evidence is most effective when it: properly reflects the specifics of the market at hand; helps to answer the relevant legal questions; and is presented clearly. This is what you will help us achieve.

We regularly support clients at all stages of competition cases, before national competition authorities and the European Commission. Examples of previous projects within our competition practice include:

Royal Mail Group

Quantifying the damages caused by a cartel amongst its suppliers.

Analysing competition in the UK mobile telecoms market for the purpose of merger control.

Advising Tobii on the economics issues associated with the merger clearance process with Smartbox/Sensory Technology.

DISPUTE RESOLUTION AND LITIGATION

Our work has been instrumental in impacting the decisions of national and international courts for a range of clients in commercial dispute resolution cases.

By joining Economic Insight, you will help us to develop a profound understanding of our clients' business and what the case specifically means to them. You will then help us use economic theory to untangle the specifics of the dispute at hand.

We have worked on a variety of different commercial dispute resolution cases, for instance for clients that are developing a claim for damages, or are arguing a competition law related breach.

Royal Mail Group

Assisting Royal Mail in its dispute against one of the major truck manufacturers.

Undertaking econometric analyses of the extent of damages due to BT by multiple automobile manufacturers.

REGULATION

We provide rigorous advice on regulatory economics across a range of industries including water, energy and telecommunications.

Our leading position is based on our deep understanding that both regulators and regulated companies need to balance a range of objectives and that there are often inherent trade-offs.

Upon joining EI, you will help us continue to be at the forefront of all matters related to economic regulation. Examples of previous projects within our regulation practice include:

Wessex Water
YTL GROUP

Comparing the efficiency of its retail service to other water companies.

centrica

Analysing consumer behaviour in the energy market using behavioural economics.

NATS

Advising NATS on the redetermination of the price control for RP3 in front of the CMA.

WHAT WE DO

CORPORATE STRATEGY

We help companies and organisations make value-adding commercial decisions. We advise them on optimal pricing and have a successful track record of influencing policy and regulation.

Our approach to strategy is not like anything else in the market – we call it **'Strategy by Science'**.

STRATEGY LAB
STRATEGY BY SCIENCE

Insight**

OUR ROLES

ANALYST

We have two graduate intake dates per year, in the Spring and the Autumn.

INTERN

We offer eight-week internships, typically for penultimate year students in the final year of their undergraduate degree (and considering undertaking a master's); or in their first year of a two-year master's programme.

We take applications on a rolling basis and therefore encourage candidates to apply as soon as possible.

HOW TO APPLY

STEP ONE - APPLY

Send your CV and a covering letter via email to **jobs@economic-insight.com**

STEP TWO - INTERVIEW

Join two rounds of interviews based around case studies. The interviews will each last around one hour and no prior knowledge of the case studies is required.

STEP THREE - OFFER

We will make successful candidates an offer. The process from interview to offer usually takes around one month.
